Description:

- 2/2-way coaxial valve
- pressure relieved, with spring return, not non-overlapping
- direct force operated
- flange connection EN1092, PN16 / PN40
- duty cycle 100% (VDE0580)
- insulation material class H 180°C
- optional installation position, preferable standing magnet
- vacuum leak rate <10^{-6} mbar l/s
- compact size by integrated actuator
- on request back pressure save
- on request it can be reciprocally flown through

Application area:

- medium temperature -40°C upto +160°C
- ambient temperature -40°C upto +80°C
- operating pressure upto 100bar, no difference pressure necessary
- IP65 (with professional installed connector plug) DIN40050 --> DIN EN 60529
- Connector plug DIN EN 175301-803, form A, LED
- for gaseous, liquid, gelatinous, highly viscous, pasty, particularly also contaminated and aggressive media
- for shortest switching times, very high life time
- for application with TÜV approval

Explanation:

The technical design of the valves is based on media and application requirements. Therefore please request your individual design for exact information about temperature ranges, feature sizes and dimensions.

Other tensions and coil powers as well as other sealings on request. Tension tolerance +5% / -10% at max. pressure and ambient temperature. Version in NC (rest position closed) and NO (rest position opened) available. For the connection to 24VDC or 230VAC by integrated or seperated rectifier.

Also available with TÜV approval for connection G1/4“ upto G1 1/4“, nominal sizes 10-25mm, upto 40bar

Flange according to other norms (e.g. ANSI) on request.

You find information about the appointment code under „Appointment details“. An overview of the complete material code is in the catalog at the beginning of the chapter of the respective product group.

Options:

- NO: opened in rest position
- HA: manual override
- EX: ExII 2G Exn IIC T4 and II D IP65 T 130°C PTB03 ATEX 2120x
- CV: chemical nickel-plated
- ZG: 3.1, DVGW, TÜV
- RS: adjustable close muting
- OF: free of oil and grease
- VU: vacuum design
- TH: higher media temperatures
- BU: non-ferrous metals
- GD: back pressure save
- UN: reciprocally flown through
**3/2-WAY COAXIAL VALVE, DIRECT FORCE OPERATED, FLANGE DESIGN**

**Bauart / Type:**

FDB7000

</table>

* The cases in the nominal sizes DN15, DN20 and DN25 have a downward designed 3. connection.

**Values apply to flow pattern A → B and A → C. For B → A the difference pressure for reciprocally flown through valves can only amount max. 16bar (Option -UN)!**

*** KV-Value:*** The nominal flow of KV to VDI/VDE 2173 indicates the water amount in cubic metres per hour, at 100% opened armature, Δp=1 bar and at a water temperature from 5 to 30°C.

**** Power consumption:*** The values apply to the standard designs. For special coils (e.g. temperature coils, option -TH) the values can vary.

---

**Appointment details:**

1. Basistype: FDB7000

2. Connection size (see chart):
   - 52-59 DIN EN1092
   - 82-89 ANSI
   - attached is the pressure stage of the flange:
     - 1 = PN16
     - 3 = PN40

3. Body material:
   - A = Brass
   - E = Nickel-plated brass
   - J = Steel
   - O = Stainless steel
   - Z = Aluminium

4. Nominal size in 1/10mm (see chart)

5. Operating pressure: Information about the max. operating pressure (see chart)

6. Tension:
   - 0: 230V AC
   - 1: 24V DC
   - Other tensions on request.

7. Options (see „Options“)

8. Medium (please indicate in your appointment!)

The technical design of the valves is based on media and application requirements. Therefore please request your individual design for exact information about temperature ranges, feature sizes and dimensions.

---

Demands on your application conditions that are not listed on the data sheet, can be requested!

The guide book and the maintenance guidelines, particularly the given safety instructions have to be paid attention to before the installation!
